Urology/  
Gynecology

General

## Full Functionality in a Single Unit

With the QA4 the patient placed in Pre-op, undergoes surgery, and recovers all in the same platform.

The QA4 is different because it provides full functionality across all surgical specialties with virtually no compromise.

## Surgical Functionality

### Lateral Tilt

- Electrically operated 12° right and left

### 'C' arm Access

- Unique sliding top allows for exceptional 'C' arm access
- Generous window dimensions

### 18" Electric Slide

### Sliding Litter Top

Electronically operated slide provides precise positioning

### Lithotomy Position

- Maximum slide perineal access
- Removable light-weight leg section
